ZILXI is the first and only topical minocycline for adults with the pimples and bumps of rosacea.

INDICATION
ZILXI™ (minocycline) topical foam, 15% is a prescription medicine used on the skin (topical) to treat adults with pimples and bumps caused by a condition called rosacea. ZILXI should not be used for the treatment of infections. It is not known if ZILXI is safe and effective in children. ZILXI is for use on the skin only (topical use). ZILXI is not for use in your mouth, eyes or vagina. Please see Important Safety Information throughout this brochure.
**WHY ZILXI?**

You Can Get On Top of Rosacea

Rosacea is a common skin condition affecting 16 million Americans.

**ZILXI is the first and only topical minocycline for adults with the pimples and bumps of rosacea.**

The foam formula is gentle on already sensitive skin while determined to help you take on rosacea.

ZILXI uses minocycline directly on the skin, from the top down. Because ZILXI is absorbed directly through the skin, you receive the benefit of a prescription-strength treatment with a low rate of systemic side effects. The foam formula contains naturally moisturizing coconut and soybean oils.*

---

**ABOUT MINOCYCLINE**

Minocycline has been shown to have anti-inflammatory effects. Many researchers believe this is why it helps treat the inflamed pimples and bumps of rosacea. However, the way ZILXI works to treat rosacea is unknown.

---

**ABOUT ZILXI**

How ZILXI Can Help You Get On Top

ZILXI is proven effective and well tolerated in scientific studies involving patients with rosacea like you*:

60%-61% reduction in the number of pimples and bumps by Week 12 (vs 49%-54% with placebo foam)*

- Some patients saw results as early as Week 4

In a satisfaction survey, the majority of patients reported a satisfying experience with treatment†,‡

Proven safe

- The most commonly reported side effect was diarrhea (1%)

Well tolerated on already-sensitive skin

- Long-term tolerability for up to 52 weeks of treatment*

Convenient, once-a-day application

---

"ZILXI contains the following inactive ingredients: soybean oil, coconut oil, light mineral oil, cyclomethicone, cetostearyl alcohol, stearic acid, myristyl alcohol, hydrogenated castor oil, white wax (beeswax), stearyl alcohol, docosanol.

**IMPORTANT SAFETY INFORMATION**

- Do not use ZILXI if you are allergic to ZILXI or any tetracycline medicine. Stop using ZILXI right away and call your doctor if you get a rash or other allergic symptom.

- Before using ZILXI, tell your doctor about all of your medical conditions and the medicines you take. Do not use ZILXI if you are pregnant, may become pregnant or are nursing. If you become pregnant while using ZILXI, talk to your doctor. Tetracycline medicine when taken by mouth during pregnancy, infancy and/or childhood up to the age of 8 years may permanently discolor teeth (yellow–gray–brown) and may slow the growth of bones.

- ZILXI is flammable. Avoid fire, flames, and smoking when applying and right after you apply ZILXI.

*ZILXI contains the following inactive ingredients: soybean oil, coconut oil, light mineral oil, cyclomethicone, cetostearyl alcohol, stearic acid, myristyl alcohol, hydrogenated castor oil, white wax (beeswax), stearyl alcohol, docosanol.

**IMPORTANT SAFETY INFORMATION**

- Protect your skin from the sun while using ZILXI. Avoid sunlight or artificial sunlight such as sunlamps or tanning beds. Stop using ZILXI if you get a sunburn.

- When taken by mouth, minocycline may cause feelings of lightheadedness, dizziness or spinning. You should not drive or operate dangerous machinery if you have these symptoms.

Please see additional Important Safety Information throughout this brochure.
STARTING ZILXI

Convenient, Once-a-Day Application

Before applying ZILXI, please remember:
• When using a new ZILXI can, wait until the can has warmed to room temperature
• If necessary, wash your face gently with a mild, non-medicated cleanser, rinse with water, and pat your skin dry
• Apply ZILXI to your face at about the same time each day, at least 1 hour before bedtime

Yellowing may occur with ZILXI:
Due to the yellow tint of ZILXI, some patients may experience a temporary, slight yellow sheen on the skin after applying. This is temporary and may be washed off with soap and water after waiting at least 1 hour. ZILXI may discolor or stain light-colored fabrics. Applying ZILXI as part of a pre-bedtime routine may help alleviate concerns about fabric staining.

STEP 1: SHAKE
Shake the can well. Place thumb under tab above nozzle and lift up to remove the cap from the ZILXI can.

STEP 2: PRESS
Press the top of the can to dispense a small amount (cherry-sized amount) of ZILXI onto your fingertips.

STEP 3: APPLY
Apply a thin layer of ZILXI and gently rub onto your entire face. You may need to use additional ZILXI to make sure that your entire face is treated.

STEP 4: WASH
Wash your hands after applying ZILXI, which can also stain fabric.

IMPORTANT SAFETY INFORMATION

ZILXI is a topical foam that contains minocycline, a tetracycline medicine. It is not taken by mouth. However, tetracyclines, when taken by mouth (capsules or tablets), may cause serious side effects, including: diarrhea, including watery or bloody stools; loss of appetite; tiredness; yellowing of your skin or eyes; bleeding more easily than normal; confusion; sleepiness; vision changes, including blurred vision, double vision, or permanent vision loss; unusual headaches; fever; rash; joint pain; body weakness; discoloration or darkening of your skin, scars, teeth, or gums. Call your doctor right away if these side effects occur.

IMPORTANT SAFETY INFORMATION

The most common side effect of ZILXI is diarrhea. These are not all of the possible side effects with ZILXI. Call your doctor for medical advice about side effects. You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see additional Important Safety Information throughout this brochure.
Have Questions About ZILXI?

You may have questions before starting your treatment with ZILXI. Speaking with your doctor can provide clarity and comfort.

**QUESTIONS YOU MAY WANT TO ASK YOUR DOCTOR:**

- Is ZILXI right for me?
- When will I see skin improvements?
- What are the side effects?
- How long should I continue using ZILXI?
- Can any lifestyle changes help my rosacea?

**YOUR ADDITIONAL QUESTIONS AND NOTES:**

---

**IMPORTANT SAFETY INFORMATION**

- Do not use ZILXI if you are allergic to ZILXI or any tetracycline medicine. Stop using ZILXI right away and call your doctor if you get a rash or other allergic symptom.
- Before using ZILXI, tell your doctor about all of your medical conditions and the medicines you take. Do not use ZILXI if you are pregnant, may become pregnant or are nursing. If you become pregnant while using ZILXI, talk to your doctor. Tetracycline medicine when taken by mouth during pregnancy, infancy and/or childhood up to the age of 8 years may permanently discolor teeth (yellow-gray-brown) and may slow the growth of bones.
